

EDI solutions for the automotive industry

ecosio offers

- » Comprehensive EDI expertise in the automotive sector
- » Planning, realisation, and monitoring of all EDI processes with clients and suppliers – all from a single provider
- » Cloud-based managed services with deep ERP system integration

In the automotive industry, ensuring the smooth flow of production processes requires seamless document exchange all along the supply chain.

We can help! With ecosio, you'll reach larger manufacturers (OEM), tier suppliers, after sales, and service suppliers in the automotive sector. With just one connection to the ecosio.MessagingHub, your company will quickly and easily fulfill all its EDI requirements for the automotive branch. Even smaller suppliers can be connected easily and cost-effectively using ecosio.Web, ecosio's web-based EDI.

We offer

- » Managed cloud-based EDI services
- » One connection for all EDI partners
- » Worry-free EDI partner connection, from initial approach to maintenance
- » 24/7 monitoring and proactive information in case of system error

Just a few examples

The following companies are already connected with the ecosio.MessagingHub on behalf of our customers:

BMW, Daimler, Porsche, Volvo, Ford, Jaguar Land Rover, Rolls Royce, Volkswagen, Hyundai, Magna Steyr, Plastic Omnium, Sekurit Gobain, FUBA Automotive, Delphi, and many more.

Web-based EDI optimized for the automotive sector ensures simple supplier connection

Your own company-branded ecosio.Web portal will allow suppliers without EDI to easily exchange structured documents with you using a simple web browser. On your end, ecosio.Web will be integrated into your EDI processes via your connection to the ecosio.MessagingHub.

Suppliers can use the web to receive, view, and download delivery forecasts (DELFOR) and detailed JIT forecasts (DELJIT). In a next step, delivery notes/advanced shipping notices (ASN) can be created, and all automotive process requirements (VDA, ODETTE, ANSI) regarding packing lists are fulfilled. All standard compliant barcode labels (e.g. VDA) can also be downloaded and printed out for each individual load carrier (pallet, covering, package, etc.). In this way, your automatized processes can be optimally supported even by suppliers without EDI capability.

Included services

- » Professional and personal client support from ecosio experts
- » High reliability due to redundant systems and daily system checks
- » Real time end-to-end monitoring of all incoming and outgoing EDI messages
- » Support for EDI connection with clients and suppliers of all sizes

Technical facts:

» Exchange formats:

- » All VDA formats such as VDA4905, VDA4984, VDA4913, VDA4987, VDA4908, VDA4938, etc.
- » EDIFACT based formats (DELFORs, DESADVS, INVOIC, RECADV, etc.)
- » ANSI ASC X12 formats, especially for North America
- » IDoc for exchange with SAP systems
- » All client-specific formats, e.g. BOSCH CSV formats, etc.

» Exchange protocols:

- » OFTP2
- » X.400
- » VAN-Interconnects
e.g. COVISINT, INOVIS, Sterling, etc.
- » AS2
- » SFTP

» Load carrier labeling:

- » ODETTE label production
- » VDA label production

As well as many more exchange formats, exchange protocols and load carrier labels on request.
